(601) 826 - 2021

1713 Frankel Ave. Metairie, La 70003

Senior Frontend Engineer

Senior Frontend Engineer with 10+ years of experience building scalable web applications using React, TypeScript, and modern JavaScript frameworks. Extensive experience developing SPAs and integrating GraphQL and REST APIs. Proven track record of driving engineering productivity through AI-assisted development tools including GitHub Copilot, Cursor, WindSurf and Claude Code, accelerating feature delivery while maintaining high-quality, production-ready code. Skilled in cross-functional collaboration, technical mentorship, and delivering performant applications at scale. Experienced with AWS and GCP, production troubleshooting, and supporting business-critical platforms.

Professional Experience

CVS HEALTH – REMOTE

FEB. 2023 – PRESENT

SENIOR/LEAD FRONTEND ENGINEER (React/Typescript)

- Conducted technical interviews for entry-level through senior developers, evaluating coding proficiency, problem-solving ability, architectural thinking, and team fit.
- Leveraged AI-assisted development tools including GitHub Copilot, Cursor, and Claude Code to rapidly prototype, develop, and iterate on complex front-end features, significantly increasing delivery velocity while maintaining code quality.
- Developed and maintained scalable front-end applications using React and TypeScript within a monorepo architecture, utilizing AI-powered workflows to accelerate implementation, testing, refactoring, and documentation.
- Collaborated with cross-functional teams to design and deliver application features, routing solutions, and API integrations, using AI-assisted tooling to streamline development and reduce implementation costs.
- Diagnosed and resolved production issues within Google Cloud Platform (GCP), combining traditional debugging techniques with AI-driven analysis to improve troubleshooting efficiency and system reliability.
- Maintained high engineering standards through code reviews, architectural discussions, and the effective use of AI-assisted code generation and validation workflows.
- Mentored junior developers on React, TypeScript, GCP, and modern AI-assisted software development workflows, enabling faster onboarding and increased team productivity.

**FAIRWAY INDEPENDENT MORTGAGE
CORP - REMOTE
REACT/NODE FULLSTACK ENGINEER**

OCT. 2021 – FEB. 2023

- Modernized Fairway's mobile application by rebuilding the interface with React and TypeScript, enabling a fully responsive desktop browser experience and improving overall performance and usability.
- Implemented unit testing strategies that achieved and maintained 95% code coverage, improving application reliability and reducing regression issues.
- Performed code reviews and collaborative debugging sessions, helping resolve complex issues related to React, TypeScript, and Node.js development.
- Mentored junior developers by providing technical guidance, code review feedback, and support with front-end development challenges.

**SIMPLIFY, LLC – REMOTE
REACT/NODE DEVELOPER**

SEPT 2020 – OCT 2021

- Implemented new front-end features using React and TypeScript, delivering functionality aligned with sprint requirements.
- Integrated Apollo GraphQL client APIs to manage data retrieval across multiple services.
- Designed and implemented application pages and routing using Next.js and React Router, improving navigation and user experience.

**CDIT, LLC – SLIDELL LOUISIANA
JAVA DEVELOPER**

DEC. 2019 – SEPT. 2020

- Implemented front-end functionality using JavaScript, including checkbox validation, eliminating page reloads and improving application performance.
- Developed optimized, high-performance Java code to meet complex client requirements within an Agile development environment, ensuring timely delivery and reliable results.
- Built interactive front-end features using JavaScript event listeners, creating seamless and responsive user experiences.

**WINGSEED, LLC – NEW ORLEANS,
LOUISIANA
FULLSTACK DEVELOPER**

NOV. 2017 – DEC. 2019

- Served as a Full-Stack Developer, integrating front-end and back-end components to deliver cohesive, high-functioning applications.
- Maintained and enhanced two social media applications, implementing new features to improve usability and keep pace with evolving technology trends.
- Developed React front-end components, creating intuitive and visually appealing user interfaces.

**NASA SHARED SERVICES CENTER
(NSSC) – STENNIS SPACE CENTER, MS
SOFTWARE/APPLICATIONS DEVELOPER**

FEB. 2013 – FEB 2017

- Developed back-end systems with a focus on Java, decoding incoming data and storing it securely in SQL databases, ensuring reliability and data integrity.
- Used Toad for MySQL to manage database connections, monitor real-time data changes, create tables, and execute queries to support development and debugging.
- Ensured smooth integration and high performance across systems, delivering robust, reliable applications that met client and stakeholder requirements.

EDUCATION

Bachelor of Science, Computer Science, 2012 - Tougaloo college, Tougaloo, MS 39174

TECHNOLOGY

Languages: HTML, CSS, JavaScript, React, Node, Typescript

AI coding tools: Copilot, Cursor, Claude Code, Windsurf

JavaScript Frameworks: Material-UI, React, Redux, React-bootstrap, Axios.js, Apollo Server, GraphQL, Webpack, Babel, React Testing Library, Jest, Typescript

Database: MySQL, Postgres, Google Cloud Firestore

Repositories: Bitbucket, GitHub, Gitlab, Git

CI/CD: Circle Ci, Github Actions, Jenkins, Harness

Cloud Technologies: Google Cloud Platform, AWS

GitHub Account: <https://www.github.com/kcdhopkins>

Website: <https://portfolio-fullstack-dev.netlify.app/>
